2. Requirements Analysis

Auto Ticket Classification using Flow Designer

2. Requirements Analysis

The requirements were identified from the school IT helpdesk use case. The system must capture ticket information in a structured format and automatically classify the ticket.

Business Requirements

- Automatically classify IT tickets based on the issue description.
- Assign both Category and Subcategory without manual intervention.
- Support dependent choice logic between Category and Subcategory.
- Send an automated email notification to the caller upon ticket creation.
- Store ticket information in a structured and standardized format.
- Ensure easy maintenance and future scalability.

Classification Requirements

Issue / Keyword	Category	Subcategory
WiFi / Network	Network	Wi-Fi
Projector	Hardware	Projector
Password / Login	Access	Forgot Password
Slow / Hanging	Performance	Slow Computer
